INDUSTRY SOLUTIONS.

Material Solutions.

## SilSo MOULDING

- ▶ High chemical resistance
- ▶ Good self-releasing properties
- ▶ High transparency
- ▶ Excellent mechanical properties

Silso APPLICATIONS

Silicone Solutions that make your life easier.

## SilSo MOULDING

Experience the benefits of being able to produce silicone moulds of almost any object, component or figure with very accurate, detailed reproduction – whether it be for architecture and industrial design, jewellery production or food moulding. Using RTV-2 part addition and condensation curing silicone elastomers selected from our SilSo MOULDING product range, models of varying size with the most complex geometries can be reproduced to the very highest quality.

## SilSo APPLICATIONS

Silicone Solutions that make your life easier.
