

CHT

SMART CHEMISTRY
WITH CHARACTER.

MIX & MATCH INNOVATIVE ADDITIVES

FOR COATINGS & CONSTRUCTION

www.cht.com

WIN WITH YOUR INNOVATION PARTNER

Whether architectural paints, coatings, construction materials and printing inks: there are countless applications for which your products have to perform at their best. The CHT Group has developed 6 highly effective additive ranges for this purpose: each of them specifically enhances the desired product properties and reliably controls your production processes.

SMART SOLUTIONS INDIVIDUALLY COMBINED

Individually combined, our 6 gamechangers offer you tailor-made solutions for your specific applications. These not only deliver reliable and scalable results, but above all live up to our commitment to quality, technical innovation and sustainability.

Do you have specific requirements? Together, we will find the best solution for your product needs.

Mix, match and improve your performance

- ▶ Optimal product properties
- ▶ Higher efficiency in processing and application
- ▶ High quality
- ▶ Ideal for developing new products

SIX ADDITIVES FOR QUALITY, TECHNICAL INNOVATION, AND SUSTAINABILITY

VARIPHOB® Hydrophobic Agents

provides long-lasting water repellency and ensure a long-lasting and environmentally friendly protection.

SPACTIVE® Defoamers

helps you to realise high-end surfaces in highly compatible foam-free industrial processes.

ULTRALUBE® Surface Modifiers

adds character to surfaces with a noticeable feel and functional properties such as slip, scratch and abrasion resistance as well as matting.

SILCO® Leveling, Wetting and Dispersing Additives

ensures brilliant colours and a homogeneous, even surface thanks to optimised wetting, dispersion and flowability.

AGOCEL® Rheology Additives

stands for a precisely adjustable rheology that creates stable, long-lasting and easy-to-process formulations.

TECOSIT® Binders

efficiently forms high-quality films that achieve robust barrier effects, water resistance and durability.
